CORE JAVA

PROJECTS

💎 WEATHERVUE APP
· A simple weather app where you can get data about humidity & wind speed by means of location.
This project aims to create a responsive and interactive front-end application using modern web technologies such as HTML,Css and Javascript to deliver accurate weather information to users across various devices.

💎 PORTFOLIO
Designed a simple yet responsive personal portfolio profile where you can download CV and navigate through different social media profiles using HTML, CSS and Javascript alone.

💎 TO DO LIST
Developed a basic to-do app that enables a user to add daily tasks. The to-do web app must allow users to add new items to a list, and items added to a list must be visible.

💎 ROLEX RESORT: E-COMMERCE WEBSITE
Designed a simple outlook of a responsive E-commerce site using HTML,Css and Bootstrap-5 technologies with added navbar with hover effects without scrolling through the page.
